## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to fluorescent lamp, classified in class 313, subclass 489.
- II. Claims 14-25, drawn to method of manufacturing, classified in class 445, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as coating the substrate with glass powder including yttrium by sintering instead of using a suspension. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to John P. Murtaugh on 3/12/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2875

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
